When in a frock and trowsers dressed.

I lemmed my A B 3. When with my dinner in my hat, I trudged away to school. Nor dared to stop, as boys do now-For school-ma'am had a rule.

With locks well curled and face so clean-Boys washed their faces then-And a stick horse to ride upon, What happy little men!

And if a traveller we met, We throw no sticks or stones. To fright the horses as they passed, Or break good people's boncs.

But with our hat's beneath our arms, We bent our heads full low, For ne'er the school-ma'am failed to ask, "Boys did you make a bow f"

And all the little girls with us Would courtesy full low, And hide their ankles 'neath their gowns-Girls don't have aukles now.

We stole no fruit, nor tangled grass, We played no noisy games, And when we spoke to older folks. Put handles on their names.

And when the hour for school had come, Of bell we had no need, The school-ma'am's rap upon the glass, Each one would quickly heed.

That school-ma'sm! Heaven bless her name When shall we meet her like! She always wore a green calash, A calico vandyke.

She never sported pantalettes. No silks on her did rustle-Her dress hung gracefully all round-She never wore a bustle.

With modest mien and loving heart Her daily task was done. And true as needle to the pole. The next one was begun.

The dave were all alike to her, The evenings just the same, And neither brought a change to us, Till Saturday forenoon came :

And then we had a "spelling match," And learned the sounds of A. The months and weeks that made the year The hours that made the day :

And on that day we saw her smile, No other time smiled she-"Twas when she told us learnedly When next "leap year" would be.

Alas! kind soul! though leap year came And went full many a time, In single blessedness she toiled. Till far beyond her prime.

But now, indeed, her toils are o'er, Her lessons are all said. Her rules well-learned -- her words al spelled--

She's gone up to the head.

"The discovery of PEPSIN forms a new era in the chemical history of Digestion. From recent experiments we know that food is dissolved as rapidly in an an artificial digestive fluid, prepared from Pepsin, as it is in the natural Gastric Juice itself."

Professor Dunglison, of the Jefferson College, Philadelphia, in his great work on Human Physiology, devotes more than fifty pages to an examination of this subject. His experiments with Dr. Beaumont, on the Gastric Juice, obtained from the living human stopach and from unimals, are well known. The great peculiarity and excellence of Dr. Christie's Galvanic Curatives, Dr. Christic's Galvanic Curatives, consists in the fact that they arrest and cure disease by a ward application, in place of the usual mode of drugging and phaseking the patient, till exhausted Nature sinks hepoteasily ander the indiction.

In a short period the internable perspiration will act on the positive element of the Belt, thereby causing a Galvanic circulation which will pass on to the negative, and thence beck again to the positive, thus keeping up a continuous Galvanic circulation afroughout the system. AN EXTRAORDINARY CASE,

REV. DR. LANDIS, A CLERGYMAN of New Jersey, of distinguished attainments and exalted re-Ds. A. H. Christik-Dear Sir: You wish to know of me what has been the result in my own case, of the application of THE GALVANIC BELT AND NECKLACE. My reply is

what hiss been the result in my own case, of the application of THE GALVANIC BELT AND NECKLAGE My reply is as follows:

For about recenty years I had been suffering from Dyspesia. Every year the symptoms became worse on could I obtain permanent relief from any course of medical treatment whatever. About fourters years since in consequence of fraquent exposure to the weather, in the discharge of my pastoral duties, I became subject to a severe Chronic Rheumatism, which for year after year, caused me indescribable inquish. Farther: in the winter of '45 and '46, in consequence of presching a great deal in my own and various other churches in this region, I was situcted by the Bronchits, which soon became so severe as to require an immediate suspension of my pastoral labors. My nersens system was soon thereughly prestrated, and as my Bronchitis became worse, so also did my Dyspepsis and Rhoumatic affection—thus evincing that these disorders were connected with each other 'Srough the medium of the Nervous system. In the whole phanmacopusis there seemed to be no remedial agent which could reach and recuperate my Nervous System; every king that I had tried for this purpose had completely failed. At last I was led by my friends to examine your invention, and (though with no very singuine hopes of their efficiency,) I determined to try the effect of the application of the GAL-VANIC BELIT AND NECKLACE, with the MAGNETIC FLUID. This was in June, 1848. To My GREIT ASTONISHMENT, IN TWO DAYS MY DESPENSA MAD GONE; IN KIGHT DAYS I WAS ENABLED TO RELIVE MY PATORAL LABORS; NOR HAVE I SINCE CHITTED A SINGLE SERVICE ON ACCOUNT OF THE BROCKHITED A SINGLE SERVICE ON ACCOUNT OF THE

DAYS I WAS ENRIGHD TO RESUME MY PASTORAL LABORS; NOR HAVE I SINCE OMITTED A SINGLE SERVICE ON ACCOUNT OF THE BRONCHITIS; AND MY RHECMATIC APPECTION HAS ENTIRELY CLASSED TO THOUSE. ME. Such is the wonderful and happy results of the experiment.

"A. H. Christir, M. Much was done previously to the application of the Bell, but with very little success, and I feel it only right to tell you, that since she commenced wearing the Belt and using the Fluid, but a few weeks ago, she has ENTIRELY RECOVERED HER HEARING, and her general health is better then for several years." several years."
